

Lest We Forget.

Cromwell goes on a Wild Ride

> Inside this Issue, now

While Denmark is Glowing within this challenge, other Countries are making their impact on this very special Exploration Day. In previous Exploration Challenges, Teachers have given great feedback; will this time be the same. Our Correspondents have been taking the School Bench as they report what happened throughout their session with their Country in class.

In Several Countries, the companies have been starting to design their Presentation Board to show the Public of their company Ideas.

In different Countries, the Travel Companies are focusing on getting Ideas inform the Community and Images along with Videos on their Countries in Europe. This does include Tourist Attractions, Architecture and the best places to be. Denmark has been focusing on finishing the Tasks that lie ahead of them. And their Research has been at the front of this. As they seem to have the best Information and he most in comparison with the others.

But not only do the companies have to prove themselves to the Public, but they have to stand-out in their very own company.

As they have to find Team Leaders and Debate on what was the best step to go next as they try and get the Victory at the end of the day.

As once the End of the Day approaches, the Companies will have to face each other and Votes will fall. When they try and prevail over the other companies out there.

But now the questioning begins: **“Who will be the Winning Company in the end?”**

Come back tomorrow as we answer this Question.
